

SMART SHOPPING COMPLEX

Shopping Complex

- 3 main problems

- Safety and security
- Time consuming
- Insufficient parking space

- SMART Car Park:
 - Utilizing both facial recognition and license plate recognition software.
 - Better security and more convenient (lesser anonymity means lesser crimes)
- DRIVE THRU:
 - Faster and more convenient.
- Possible Future Upgrades:
 - Application of AI powered machine vision system in monitoring the whole shopping complex such as car park and elevator among others.
 - Automatic crime detection and reporting system.
