# Idea

Face Recognition on Car from preventing car stealing by stranger.

# Concept

By using face detection to determine and send the face of the driver to the car owner's electronic gadget by specific application and located the GPS system.

If the car owner did not recognize the driver, the car owner can take action immediately.

If the driver wear any mask, will fail detect and send report to the police station.

# CHALLENGING

- High Time Consumption to keep integrating it
- Lack of tool
- Error handling
- Expensive cost

# Solution

- Undergoing more test to make sure reduction of mistake
- Corporate with Government by saving cost
- Communicate with engineers and experts on this region
